Subject: Suggestions Concerning FDD Publications on Communist China

NSA submits the following suggestions for technical improvements in the FDD Summary and other FDD publications on Communist China.

1. Chinese characters should be included for all plant and organizational names of every type. This would greatly aid in reconciling differences in translation. Where this is not feasible, the page number should be included in the documentary source of each item to facilitate reference to the original source.
2. When providing Chinese characters, NSA prefers that they be supplied in the text of the summary (immediately after the translation) rather than in an appendix. If the appendix is retained, however, it is suggested that entries be cross referenced by page number to their exact location in the summary.
